DMS 200	Product Name	Product Type	Key Features & Uses	Pricing
	Nortel DMS 200	Digital Multiplex System Switch	<ul style="list-style-type: none"> Can handle up to 60,000 trunks 	Click here to request a quote for the complete system
	Description <p>DMS 200 has the ability to handle from a few hundred to 60,000 trunks. This switch can also serve a Access Tandem (AT) function. The Traffic Operator Position System (TOPS) puts operator services into the DMS 200. Operator Centralization (OC) allows a single operator location by using the TOPS positions to transfer operator services from other DMS-200 toll centers. The Auxiliary Operator Services System (AOSS) let operator services on calls that need outside information (Such as Directory assistance).</p> <p>A DMS-100/200 is also available and allows local and toll features described above but also includes an Equal Access End Office (EAEO)/Access Tandem (AT) combination. It has the ability to handle up to 100,000 lines or 60,000 trunks.</p>			
DMS 250		Nortel DMS 250	Digital Multiplex Switching System	Click here to request a quote for the complete system
